

Docket No. AUS920030660US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR MANAGING FUNCTIONS
IN A CAMERA PHONE**

A method, apparatus, and computer instructions for managing a camera in a mobile communications unit. A location of the mobile communications unit in a selected area is determined. Depending on the location of the mobile communications unit, a signal is sent which causes at least one camera function in the mobile communications unit to be disabled or limited.
